Proposal Objective The Objective of this proposal is to develop an Integrated Regional Water Management Plan for the Los Angeles Gateway IRWM Region. This plan will fully comply with the Proposition 84 Guidelines and Standards and will affirmatively address the objectives developed from the Regional stakeholders during the IRWMP development process. The plan will include regional projects and programs that will: effectively integrate water management with land use planning; improve water reliability and water use efficiency; address climate change effects; expand environmental stewardship for the Los Angeles and San Gabriel Rivers; promote and practice integrated flood management; and protect surface water and groundwater quality. These projects and programs will also contribute to the attainment of two CALFED Bay-Delta Program Objectives: improving the state's water quality, and providing increased water supplies and more efficient and flexible use of water resources. *

Q1. PROPOSAL DESCRIPTION

Provide a brief abstract of the Proposal. Please note if the Proposal will facilitate or support the participation of DAC's in the IRWM planning effort.

The cities of the Los Angeles Gateway Region (Gateway Region) and interested parties are planning to develop an integrated regional water management plan (IRWMP). These cities share water resources; have many common flood, water quality, water supply, and storm runoff problems; and share demographic similarities. These common traits provide a unique opportunity to jointly find common, integrated, and coordinated solutions through the IRWMP process. The Gateway Region formed an official joint powers authority (JPA) under California law to steer their planning efforts and provide solid governance for plan development and implementation. Two water management issues have been highlighted within the region: storm water management and groundwater quality protection. While other issues also exist, these two problems, their solutions, and required funding needs further bind the Gateway Region together. Because disadvantaged communities will be represented by cities that are full members in the development of the IRWMP and will provide input and comments, it should be recognized that this participation will ensure that their water supply and water quality are protected and enhanced.
